MICHAEL MOORE WE NEED YOU!

The neglect of Flint residence by the Genesee County Department of Health and Human Services is a disgusting tale that needs to be told. The sole focus of management was to meet metrics to please the big shots in Lansing. Zero effort was given to actually serving the community nor was being a reputable employer.

They crafted a "local office complaint policy" which so frustrating that clients just gave up on getting the benefits they needed entirely. Nothing changes because Lansing is mostly unaware of the problem.

The Lansing complaint number should be posted in every office. Period. No different than having corporate phone numbers on drive thru windows at McDonald's.

Only Michael Moore can deliver the smack down and reality check those in charge truly deserve. Flint put ya on the map and we still need you badly!
